

University of Missouri Department of Radiology

Intergrated Residency Program:

The Diagnostic Radiology program is a five-year integrated residency which includes a clinical year "integrated" throughout the five years of the program. We accept applications only through ERAS and usually only consider PGY1's. We do consider IMG's if circumstances allow but do not sponsor visas. The deadline for application is November 1st, and interviews are scheduled from early December through mid-January. We receive approximately 300 applications and invite 50 to 80 candidates to interview for four positions.
